OBJECTIVE

Final-year Computer Science (Data Science) student with expertise in analytics, machine learning, and statistical modeling, skilled in Python, Power BI, and modern ML frameworks. Experienced in building predictive models and scalable solutions that turn data into actionable insights. Passionate about AI agent development, reinforcement learning, and generative AI to create adaptive systems that drive ethical, impactful innovation.

EDUCATION

Vignan Institute of Technology and Science,

B.Tech in Computer Science and Engineering(DATA SCIENCE),CGPA (Upto 5 Semesters) : 8.59 2023 - 2027

SKILLS

- **Programming & Web Tech:** Python, Java, R, SQL, C, HTML, CSS, JavaScript, React, FastAPI, Streamlit.
- **AI & Machine Learning:** Generative AI, Prompt Engineering, LangChain, RAG, Predictive Modeling, Model Evaluation, Data Preprocessing, Hyperparameter Tuning.
- **Libraries & Frameworks:** Scikit-learn, Pandas, NumPy, Plotly.
- **Data Tools & Databases:** Power BI, Tableau, Excel, MySQL, MongoDB, Jupyter Notebook, Google Colab.

EXPERIENCE

Agentic AI Intern —Innomatics Research Labs —Hyderabad,Telangana 09-Feb 2026 - 14-May 2026

(Gained practical experience with Python, FastAPI, LangChain, LangGraph, and LLMs by implementing RAG systems, AI agents, and prompt-engineering workflows.Developed a RAG-based Customer Support Assistant using ChromaDB, semantic retrieval, and HITL escalation, improving response accuracy by 15% and reducing manual support effort by 20%.)

PROJECTS

AutoML Framework :Developed an end-to-end Automated Machine Learning web application using Python, Streamlit, Scikit-learn, Pandas, NumPy, and Plotly that automates data preprocessing, model training, hyperparameter tuning, and performance evaluation for both classification and regression tasks.Improved model training speed by 30% and increased classification accuracy by 5%.

Tech Stack:Python,Streamlit,Scikit-learn,Pandas,NumPy,Plotly,Joblib([Github](#))

Wine Quality Prediction System : Built an end-to-end ML pipeline for wine quality prediction using red and white wine datasets (6.5K samples). Performed data cleaning, EDA, preprocessing, feature encoding, and model training using Random Forest Regression (R^2 : 54.5%). Deployed a Streamlit web application for real-time prediction and model inference.([Github](#))

CERTIFICATIONS

- Attended the 5-days Hands-on workshop on Machine Learning organised by Innomatics Research Labs.
- Certified in Programming Through Java Course on NPTEL and scored 82
- Certification in Python Essentials from CISCO.
- Completion of 30 Days Python using AI Program Conducted by AI FOR TECHNIES.
- Participated in Pitch Fest conducted by Thiran 2026 at Sri Eshwar College of Engineering.

ACHIEVEMENTS

- Achieved the Best Project and Consultation Prize in SIH- Hackathon 2024 ,organised by IEEE Hackathon in GURU GANAK INSTITUTE OF TECHNOLOGY.
- Competed in Google AI Exchange Hackathon organised by Google
